Career History

Liquitty, Bogotá, Colombia

Software Developer Sr

Apr. 2026 – Present

Developing a self-management application to handle payment deals for financial debts, building features from frontend to backend and delivering solutions across different environments up to production, using and applying different integration techniques and tools.

Skills: Docker, Linux, CI/CD, Bash, Git

AAK Tele Science, California, United States

Software Engineer Consultant

Apr. 2026 – May. 2026

Provided consulting services for a tracking management platform, focusing on performance optimization and vulnerability detection. Identified and resolved a critical issue causing redundant requests, leading to improved system efficiency, responsiveness, and user experience.

Skills: ReactJs, Git, Python

Magneto Global, Medellín, Colombia

Software Developer Sr
SEO Team

Aug. 2024 – Feb. 2026

I played an active role in migrating the repositories for the job listings and the main homepage views from Next.js 12 to a modern version of Next.js 15. Throughout this process, we ensured compatibility and stability while maintaining previous performance metrics.

Additionally, we decided to consolidate both repositories into a monorepo structure, which benefited the company by unifying the versioning of both projects and managing both deployments from a single repository. This improved maintainability and workflow.

Furthermore, we managed to maintain previous traffic and quality metrics, improving the company's SEO metrics by 5%.

Skills: NextJs, AWS, Redis

Magneto Global, Medellín, Colombia

Software Developer Ssr
Mobile Team

Jul. 2022 – Aug. 2024

I was involved in the design, planning, and development of the Magneto Empleos mobile app. Architectural and design decisions were made with the goal of ensuring scalability, maintainability, and stability.

We carried out deployment tasks on the Android, iOS, and Huawei app stores.

Given the project's success, we managed to increase the number of applications for our job openings by 18% and, at the same time, position the app as the primary source for attracting new candidates. Additionally, we achieved market acceptance with a rating of 4.8.

Skills: ReactJS, Flutter, RabbitMQ, ElasticSearch

Magneto Global, Medellín, Colombia

Software Developer Jr

Dec. 2020 – Jul. 2022

I participated in the migration of the Magneto Empleos application from a monolithic architecture to a microservices architecture, built primarily using React and Node.js. During the process, various modules were migrated, resulting in a more scalable and maintainable project and saving the company unnecessary expenses through engineering processes.

The migration achieved milestones of up to a 50% reduction in infrastructure resource consumption to maintain the system, thereby saving financial resources. Software engineering techniques, best practices, and development principles were applied to meet the established objectives.

Skills: Node.js, React.js, PostgreSQL, MongoDB

Quantica Marketing Digital, Manizales, Colombia

Software Developer Jr

Jun. 2020 – Dic. 2020

Software Developer focused on CMS solutions using WordPress, Joomla, and PHP, implementing business requirements and design objectives. Also designed and developed a mobile application for shopping centers using React Native.

Skills: Wordpress, PHP, React, Css

LeaderShip**Magneto Global, Medellín, Colombia**

Jul. 2022 – Dic. 2025

I led the mobile and SEO team, where I managed up to three engineers with varying levels of experience, ranging from junior to senior.

I successfully addressed the company's needs through code reviews, user stories refinement, team leadership, and the definition of deployment pipelines, integration, and monitoring methods.

Skills: AWS, Jenkins, Git, Scrum, Azure DevOps.

Education**Universidad de Caldas, Manizales, Colombia**

Jan. 2014 – Jan. 2020

Systems and Computing Engineering, Bachelor's Degree

Universidad Autónoma de Manizales, Manizales, Colombia

Jun. 2022 – Jun. 2023

Software Engineering, Postgraduate Degree
